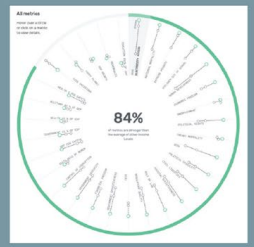
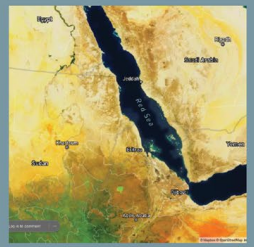
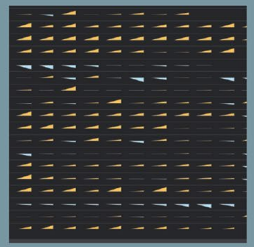
Press





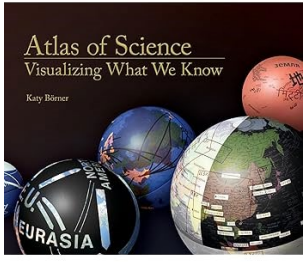


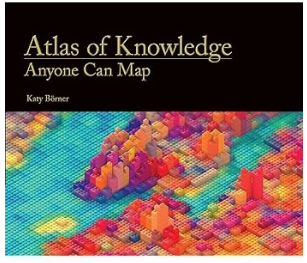
Agenda

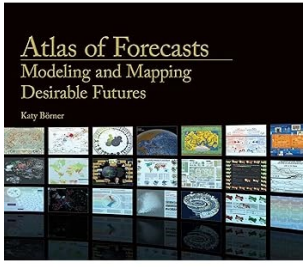
Thursday June 6, 2024, all times are ET

4:15 pm	Welcome by Katy Börner
4:20 pm	Introduction to *Places & Spaces: Mapping Science* Exhibit by Katy Börner
4:25 pm	Introduction to the 20th Exhibit Iteration by Lisel Record
4:30 pm	*The Shape of Change* presented by Beatriz Malveiro and Rita Costa
4:40 pm	*River Runner* presented by Sam Learner
4:50 pm	*The Whole Picture* presented by Liuhuaying Yang
5:00 pm	*How Do We Compare?* introduced by Lisel Record
5:05 pm	The 3rd Decade of the Exhibit by Katy Börner
5:10 pm	Acknowledgements by the Curatorial Team
5:15 pm	Drop by Seminar Room 120 for *Lateral Thinking Gone VR*
	Visit the theater to watch *Humanexus*

1st Decade of *Places & Spaces*: 100 Maps (2005-2014)



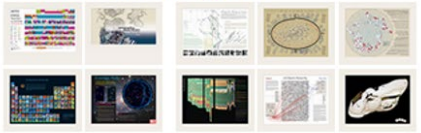




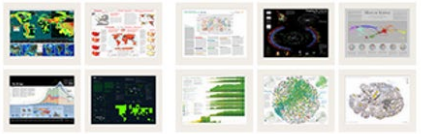
https://scimaps.org/maps

Iteration I (2005)
The Power of Maps

Iteration II (2006)
The Power of Reference Systems



Iteration III (2007)
The Power of Forecasts

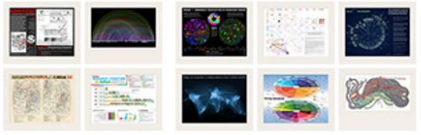


Iteration IV (2008)
Science Maps for Economic Decision Makers

Iteration V (2009)
Science Maps for Science Policy Makers

Iteration VI (2010)
Science Maps for Scholars

Iteration VII (2011)
Science Maps as Visual Interfaces to Digital Libraries

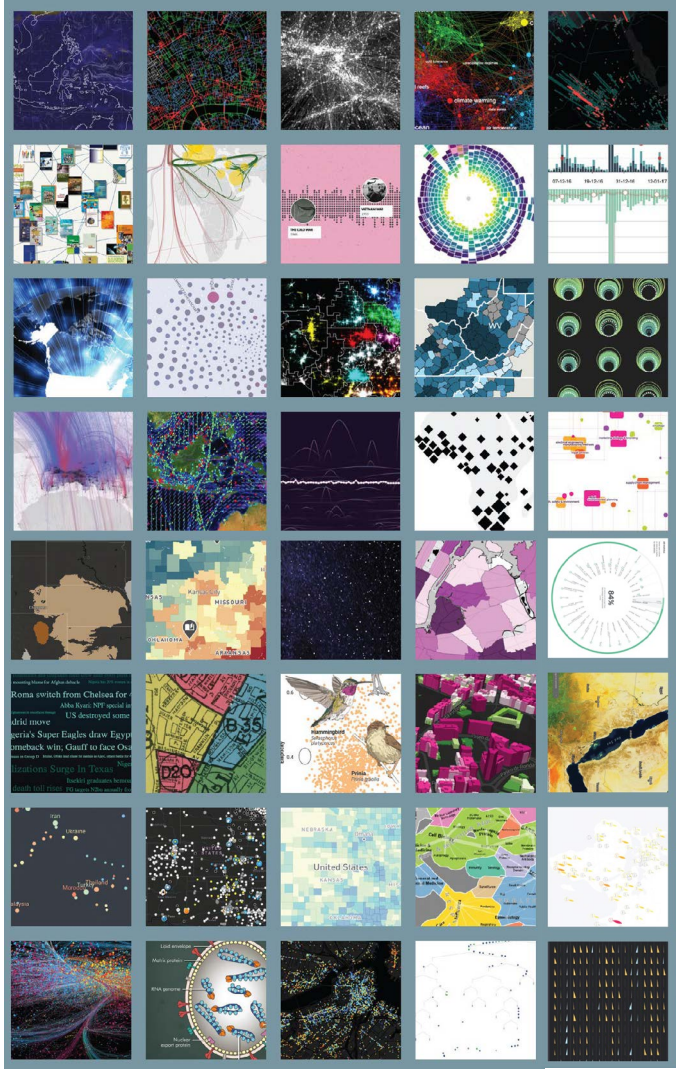


Iteration VIII (2012)
Science Maps for Kids

Iteration IX (2013)
Science Maps Showing Trends and Dynamics

Iteration X (2014)
The Future of Science Mapping

2nd Decade of *Places & Spaces*: 40 Macroscopes (2015-2024)



MACROSCOPES
Atlas of Epic Data Adventures

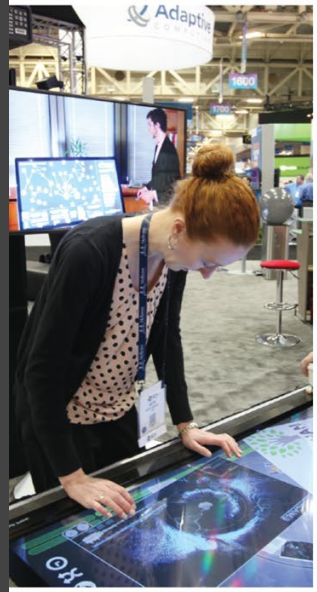
Places & Spaces: Mapping Science



Places & Spaces maps on a touch table at the International Conference for High Performance Computing, Networking, Storage, and Analysis, New Orleans, LA

Introduction to the Exhibit

Created by experts in science, humanities, and the arts, the works collected in the *Places & Spaces: Mapping Science* exhibit convey the excitement of scientific progress and discovery. Maps of science chart the more abstract spaces of data and knowledge, helping us forecast new fields of inquiry and enabling us to tell stories that we can all understand and act upon. An interdisciplinary and international advisory board chose each of these exhibited works as an outstanding example of how visualization can bring patterns in data into focus.

As of 2020, 100 maps by 215 mapmakers have been displayed at 396 venues, in more than 28 countries, on 6 continents. Each unique venue adds its own value. Ultimately, the exhibit is like the eponymous stone in the story of stone soup—with experts around the globe contributing singular visualizations that ask new questions while offering solutions to meet local contexts and needs.

The *Atlas of Forecasts* features maps designed for kids—the next generation of experts and leaders; maps showing trends and dynamics in the past, present, and future; and maps that foreshadow the future of science mapping. The 30 maps featured here communicate complex data; help bridge gaps between experts in academia, industry, and government; and help align forces toward the identification and implementation of desirable futures.

The exhibit team: Lisel Record, Katy Börner, and Todd Theriault

Illuminated Diagram display at the Smithsonian Folklife Festival, Washington, D.C.

Geoffrey West, distinguished professor and past president, Santa Fe Institute, introduces Börner's Betazone talk at the World Economic Forum, Davos, Switzerland

Places & Spaces digital display in the iPearl Immersion Theater, James B. Hunt Jr. Library, North Carolina State University, Raleigh, NC

The *Visionary Approaches Timeline* from the *Atlas of Science* on display at the Mundaneum, Mons, Belgium

"New Trends in eHumanities Research" workshop at the Royal Netherlands Academy of Arts and Sciences, Amsterdam, Netherlands

Ken Kennedy Institute for Information Technology, Rice University, Houston, TX

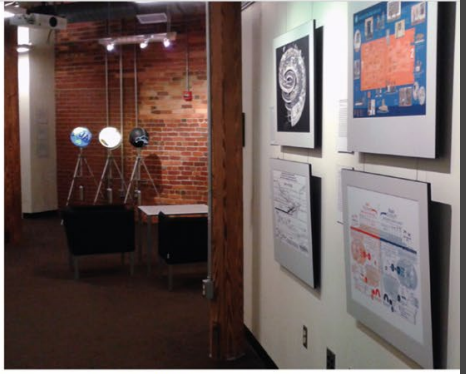


Exhibit maps and Ingo Günther's WorldProcessor globes on display at Duke University, Durham, NC

Katy Börner debuts the exhibit at the University of Miami, Coral Gables, FL

100 science maps on display at the University of Miami, Coral Gables, FL

Maps on display at the European Commission, Directorate-General for Research and Innovation, Brussels, Belgium

Jax and the Big Data Beanstalk theater piece introduces visitors to data visualizations and science maps at the Science Museum of Minnesota, St. Paul, MN

Katy Börner presents "Maps & Macroscopes" at TEDxBloomington, Bloomington, IN

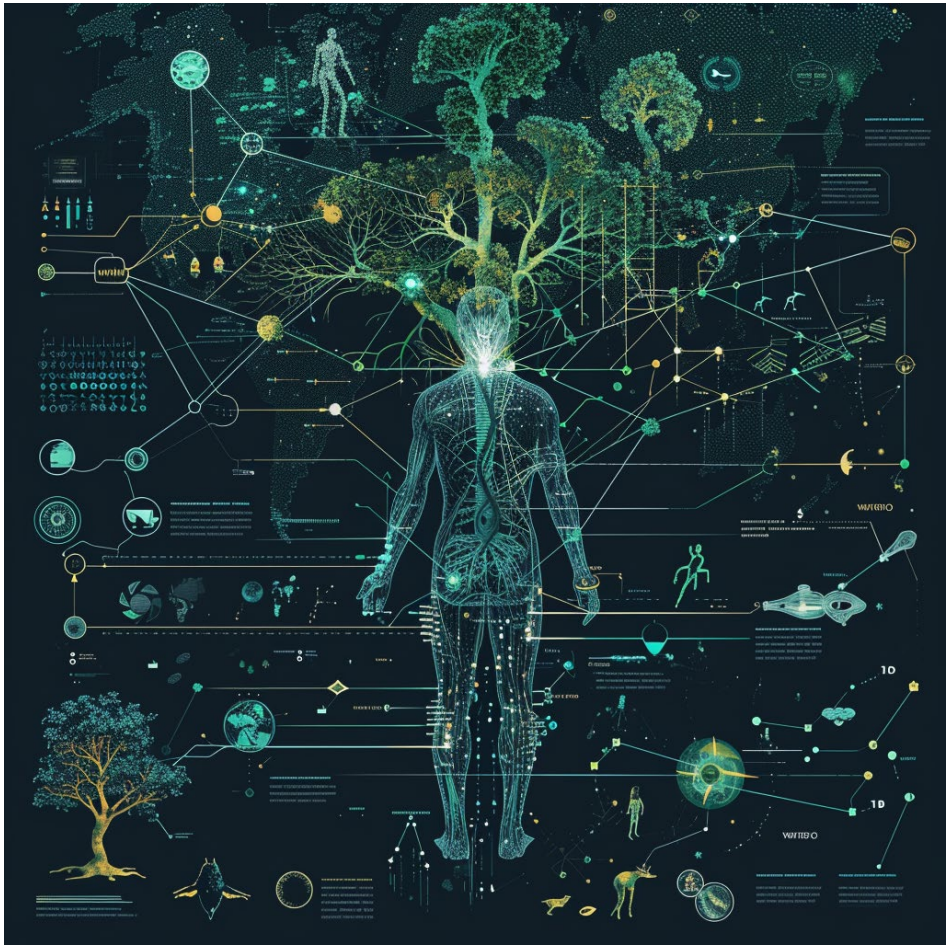
3rd Decade of *Places & Spaces*: Envisioning Intelligences (2025-2034)



https://scimaps.org

wermind using https://www.midjourney.com

Envisioning Intelligences

Including

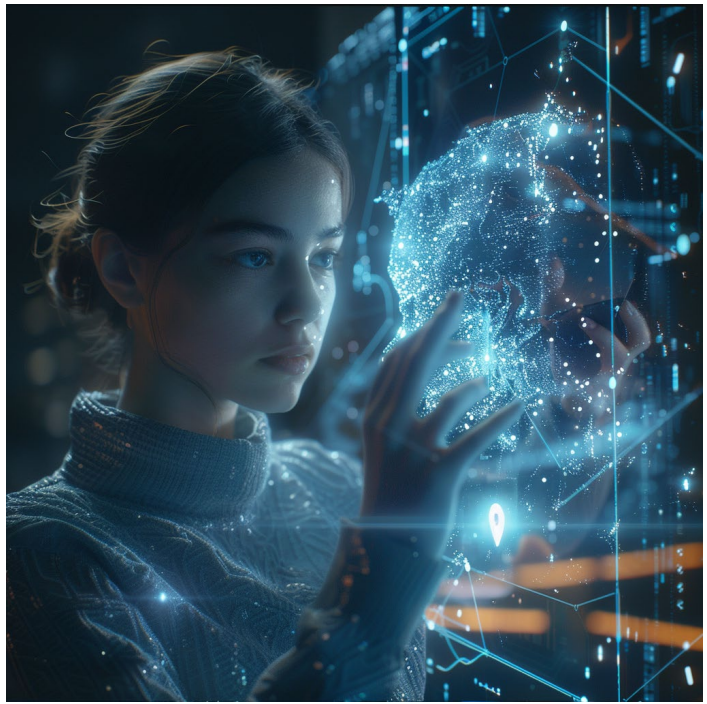
- linguistic, kinesthetic, communication, musical, emotional, and other intelligences by biological and technological life forms

with a focus on

- collaboration & coordination across life forms and intelligence types

to inspire discussion about

- existing and future sensors & actuators, memory & reasoning, exploration & communication, plus shared goals & desirable futures.



.master_of_code_global using https://www.midjourney.com

We would like to thank

The fantastic team at University Collections, including especially Brian Woodman, Alisha Beard, Jake Goode, and Bill Bass.

The amazing Carrie Longley and Ingo Günther for sharing original artworks.

The multi-talented Ezra Engels, Tracey Theriault, and Todd Theriault for installing the exhibit.

The creative Melanie B. Goldstone for website design.

The eloquent Pete DiPrimio for composing the IU News Story.

The visionary Andreas Bueckle and Kyah Hiers-Vavrek for taking event photos.

The technical expertise of Haley Scruggs, Nicole Johnson, and the Luddy IT Team for online event support.

Places & Spaces: Mapping Science

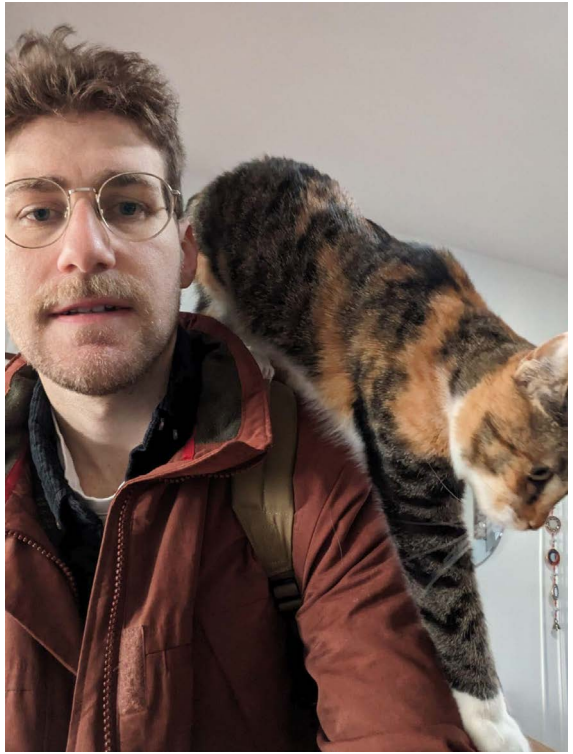
Thank you

Liuhuaying Yang
Data visualization practitioner

River Runner

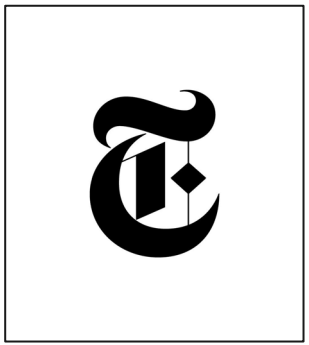
Places & Spaces Macroscope

Hi, I’m Sam!



Work

- Data and graphics journalist at the FT on our visual storytelling team
- Cover a wide range of topics (science, politics, international coverage)
- Previously worked at the New York Times (Interactive News Team)



“Visual storytelling”

- Work on stories that are better told in a visual format, rather than through words alone
- Incorporates:
  - Reporting/writing
  - Data gathering
  - Graphics/mapping
  - Web development/design

FINANCIAL TIMES
A lightning assault by Ukrainian forces in the first half of September decimated Russia's defences in north-eastern Ukraine and saw Kyiv reclaim as much territory in a few days as Moscow had captured in months.

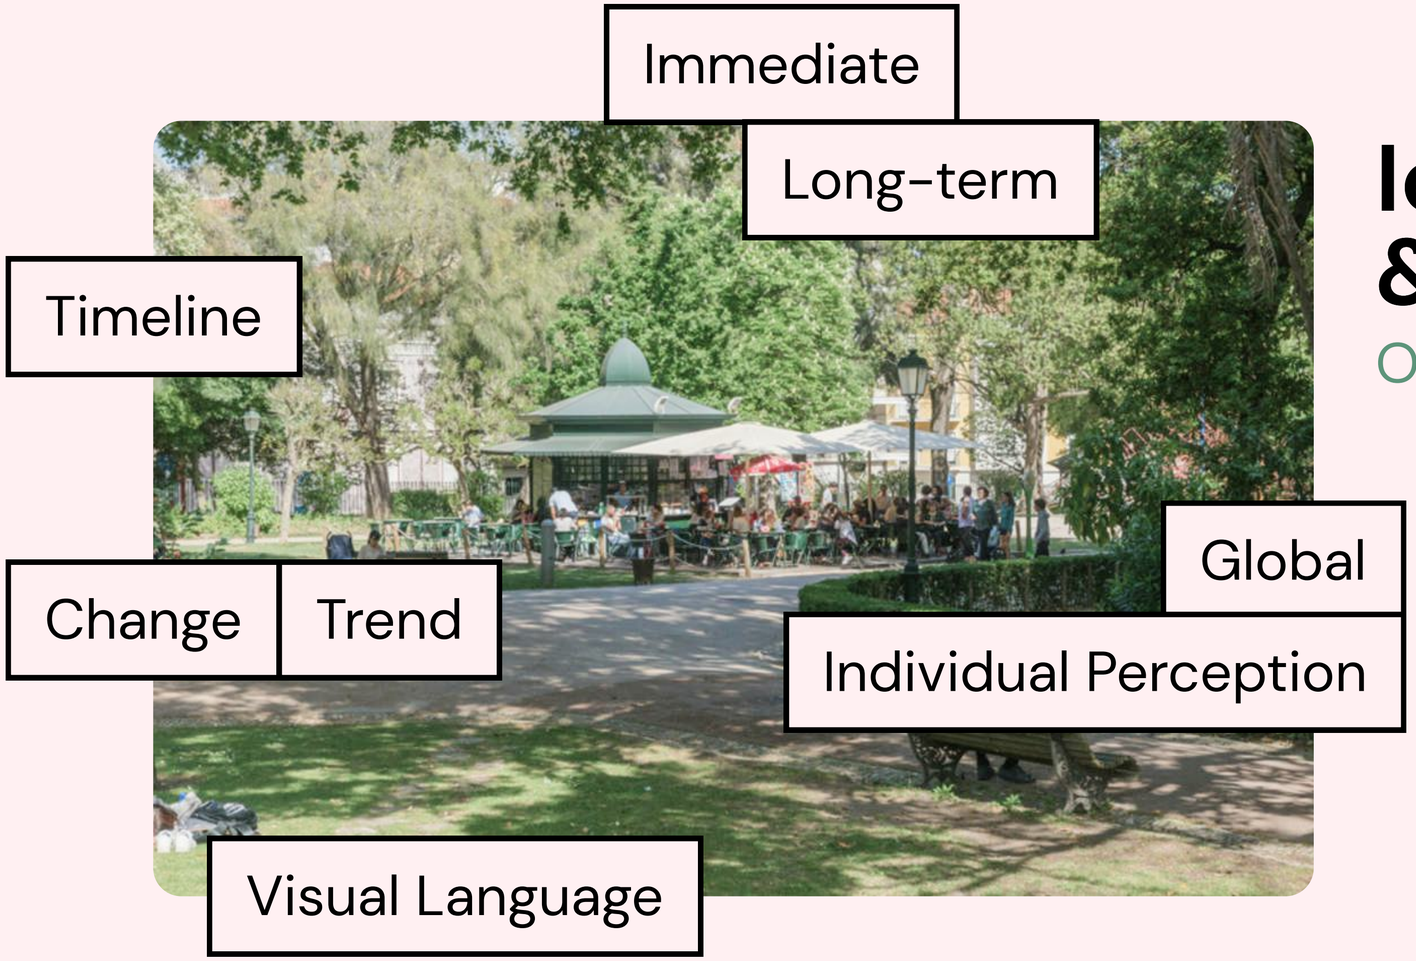
PROCESS



Ideate & Sketch

Outside

PROCESS

Moments vs. Trends

Challenge how our perceptions impact our estimation of long-term trends

PROCESS

Visual Language

Develop a distinct visual representation from the data.

PROCESS

Learn

Use reader interaction for introducing the visual representation and to improve data recall.

PROCESS

Explore

Allow for reader to analyse the larger dataset through the same visual elements.
