NOVEMBER 22, 2024

5:00 PM – 6:00 PM / SIDNEY AND LOIS ESKENAZI MUSEUM OF ART

Connections Between Art, Science, and Engineering: A Conversation with Dr. Katy Börner

Explore the frontiers of data visualization with expert Dr. Katy Börner!

Katy Börner is the Victor H. Yngve Professor of Engineering & Information Science in the Department of Intelligent Systems Engineering & Information and Library Science at the Luddy School of Informatics, Computing, and Engineering, as well as several other academic positions at IU Bloomington

She and her team research, develop, and serve innovative methods to model and visualize data from science, technology, biomedicine, education, and public policy so many can make better decisions that lead to more desirable futures.

She is a curator of the international Places & Spaces: Mapping Science exhibit now on view at the McCalla Building.

Free

explore: **Social and Historical Sciences, Arts and Humanities, Natural and Mathematical Sciences, american art, education, art and science, art education, curator talk, Hoosier experience, technology**
