Places & Spaces: Exhibit to Move from Maps to Macroscopes

Tuesday, 10 November 2015

After ten years, the exhibit is now comprised of 100 maps, an interactive display of worldwide scientific endeavors, hands-on activities for kids, illuminated globes, an award-winning animated film, an informative and dynamic website, and more. This year, however, *Places & Spaces* is moving in a direction that marks both a continuation of and a deviation from its past achievements. While the last decade has been mainly devoted to static maps of science, the next decade's mission will be devoted to exploring the power and potential of macroscope
