

## Φ·SOE News

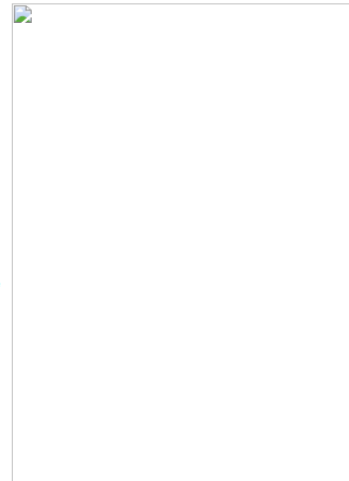

Φ·SOE = Fachverband Physik sozio-ökonomischer Systeme  
(= Physics of Socio-Economic Systems Division)

The mathematical and computer simulation of social and economic systems is receiving more and more attention. The dedicated scientific community is rapidly growing and involves, besides sociologists and economists, also physicists, mathematicians, computer scientists, biologists, engineers, and the communities working on complex systems and operations research. To keep an overview, it is important to be well connected, and to benefit from shared information platforms.

The division on "Physics of Socio-Economic Systems" (Φ·SOE, previously AKSOE/AGSOE) is committed to support the scientific exchange between the scientific disciplines involved. It has currently more than 200 members and organizes a spring conference with more than 50 contributions each year. During this conference, it features outstanding international speakers not only from socio- and econo-physics, but also from sociology and economics. Furthermore, scientists are awarded for outstanding innovative work in this field.

- **Informations for the DPG Spring Meeting (Regensburg, March 21-26, 2010):**  
SOE: Conference Program (**19 pages**)  
SOE: Overview of Invited Talks and Sessions (**2 pages**)  
SOE: Conference Highlights (**2 pages**)  
Dirk Brockmann will receive the Young Scientist Award (Poster)
- Download the Φ·SOE newsletter (October 2009)
- Submission for the "Young-Scientist Award for Socio- and Econophysics 2010" is now **closed!** Thanks for the nominations.
- Working Group on Physics of Socio-Economic Systems (AGSOE) is a Division of the DPG (SOE), starting October 1, 2009 >>more
- Download the Φ·SOE newsletter (August 2009)
- Download the Φ·SOE newsletter (July 2009)
- New Open Positions
