

Welcome to EuroVis 2010

Eurographics/IEEE Symposium on Visualization, June 9 - 11, Bordeaux, France

EuroVis 2010 is the 12th annual Visualization Symposium jointly organized by the Eurographics Working Group on Data Visualization and the IEEE Visualization and Graphics Technical Committee.

Bordeaux enjoys a strong cultural background in computer science and recently experienced a burst of development involving institutional partners such as [CNRS](#) and [INRIA](#).

Visualization has become an increasingly important research area due to its wide range of applications in many disciplines. EuroVis is a [Eurographics](#) and [IEEE](#) co-sponsored international visualization symposium held in Europe every year since 1999, with the objective to foster greater exchange between visualization researchers and practitioners, and to draw more researchers in Europe to enter this rapidly growing area of research. EuroVis has an expanded scope to include all areas of visualization, and a sponsorship to allow us to achieve a more wide-spread impact.

Papers accepted for EuroVis will be published in an issue of [Computer Graphics Forum](#), the International Journal of the Eurographics Association, using a two-stage review process. Papers should be at most 9 pages excluding references and at most 10 pages including references.
