THE REPRESENTATION OF CONTROVERSIAL OBJECTS: NEW METHODS OF DISPLAYING THE UNRULY AND THE ANOMALOUS IN SCIENCE AND TECHNOLOGY STUDIES

The program committee invites contributions that explore unruly objects in science and technology — including controversial, invisible, secret, or anomalous things. We are especially interested in showcasing new forms of representation and display, and welcome experimentation with theory, method, and conferencing modes.

For more detailed information, contact the Program Chair:

Marianne De Laet
