## JUNE 6, 2024

4:00 PM – 6:00 PM / UNIVERSITY COLLECTIONS, 525 N INDIANA AVE, BLOOMINGTON, IN 47408

### “Places & Spaces: Mapping Science” Opening Reception

Join us for the opening reception of our latest exhibition, “Places & Spaces: Mapping Science!”

Science maps serve as visual interfaces to immense amounts of data, depicting myriad objects in ways that allow us to effectively discern apparent outliers, clusters, and trends.

The *Places & Spaces: Mapping Science* exhibition aims to introduce science mapping techniques to the general public and to experts across diverse disciplines for educational, scientific, and practical purposes. It is meant to inspire cross-disciplinary

discussion on how to best track and communicate scholarly activity and scientific progress on a global scale. The exhibit is curated by the [Cyberinfrastructure for Network Science Center at Indiana University](#).

This exhibit will feature unique graphic data visualizations, a hands-on VR interactive, and more!

To learn more about the *Places & Spaces: Mapping Science* exhibition visit their [website](#).

**Registration for this event is now closed.**
